ABOUT LBCRANES

At LBCranes we are dedicated to providing our customers with the best solution for their lifting needs. We offer high quality services to keep your equipment running safely and efficiently.

Our highly trained team is committed to excellence and customer satisfaction. We offer preventive and corrective maintenance services, assistance, repair and equipment sales.

Our primary mission is to provide our customers with exceptional service in the sale and maintenance of overhead cranes. We strive to understand each customer's unique needs and provide them with a customised solution.

We complete each project safely and efficiently, and work tirelessly to ensure the satisfaction of all of our customers.

Our hoists

Discover the versatility of our hoists. We offer chain hoists and wire rope hoists to meet your lifting needs.

Wire rope hoists use a strong steel wire rope, while chain hoists rely on a solid steel chain.

Our hoists

Complete Stock
In all our components.

Self-Production
We manufacture our products.

Delivery
Competitive delivery times.

Wire rope hoists

Increased lifting capacity, lifting up to 250 tonnes.

Chain hoists

Lower capacity. Commonly used in light duty applications.

Cable hoists

Wire rope hoists offer a compact and lightweight solution for your lifting needs. Their design includes exposed chain feet, allowing flexible mobility when dragging the chains to the desired destination.

These hoists are highly versatile and suitable for a variety of environments, from marine work to the forestry industry, where durable and flexible machinery is required.

The main advantage of electric hoists of this type is their ability to handle heavier loads and their higher lifting speed.

These hoists are powered by an electric motor, which makes the lifting task more efficient and bearable.

They use a hitch and strap system to lift and transport loads safely.

Features

These hoists are an indispensable tool in the construction sector and other industries, as they facilitate the safe and efficient lifting of loads.

In addition to their superior load capacity compared to chain hoists, wire rope hoists stand out for their versatility and ease of use. Their compact and lightweight design makes them ideal for adapting to different working spaces and environments.

Cable hoist 5.0Tn

6.3Tn cable hoist in a single-girder overhead crane.

Chain hoists

At LBCranes, we offer a wide range of chain hoists designed to meet your lifting and travel needs.

Both manual and electric options are available, giving you the flexibility to choose the one that best suits your requirements.

Our chain hoists stand out for their ergonomic design and small dimensions, making them highly manoeuvrable and comfortable to use.

Those hoists are ideal for low to medium loads, from 63 kg to 2000 kg, they offer an efficient solution.

Features

With precise operation and low load swing, thanks to the standard-equipped frequency-controlled trolley, we guarantee safety and optimum performance.

In addition, maintenance is easy, without the need for special tools to exchange components or install spare parts.

Cable hoist 5.0Tn

6.3Tn cable hoists.
