

SERVICE

ABOUT LBCRANES

At LBCranes we are dedicated to providing our customers with the best solution for their lifting needs.

We offer high quality services to keep your equipment running safely and efficiently.

Our highly trained team is committed to excellence and customer satisfaction.

We offer preventive and corrective maintenance services, assistance, repair and equipment sales.

Our primary mission is to provide our customers with exceptional service in the sale and maintenance of overhead cranes. We strive to understand each customer's unique needs and provide them with a customised solution.

We are dedicated to being a reliable and responsive company to all of our customers.

We complete each project safely and efficiently. We work to ensure the satisfaction of all our customers.

Assistance services

Our overhead crane support services ensure the safety and efficiency of your operations.

We have a highly trained team that offers customised solutions.

We perform comprehensive assessments and provide 24-hour assistance in case of emergency. We keep your equipment in top condition for trouble-free load handling.

Preventive Maintenance

Preventive maintenance is essential to extend the service life of your overhead cranes.

We provide detailed assessments and solutions tailored to your specific needs.

Avoid workplace accidents and optimise performance with our preventive maintenance service. Rely on the constant availability of support for uninterrupted operation.

Prolongs the useful life of the equipment.

Avoids accidents at work.

Increases performance.

Upgrades

At LBCranes, our dedication to innovation is reflected in our modernisations and state-of-the-art components.

We provide solutions that enhance the functionality of your lifting and material handling systems.

Investing in equipment modernisation is a smart and essential decision to ensure productivity and efficiency in your business.

Our innovative parts are designed to take your operations to the next level, delivering exceptional performance and reliability.

Upgrades

Side-pull prevention

A high-precision inclinometer is added to detect any tilt or deflection in the load.

Upper Safety Light

Clearly mark the crane's area of operation, ensuring that nothing and no one is placed in the area.

Hoist replacement

When a hoist has reached the end of its service life, it may be more efficient and cost-effective to replace the entire hoist rather than just a few components.

LED lights upgrade

It incorporates more powerful lights to cover the shadows that the cranes themselves cast in the area of operation.

Upgrades

End carriage replacement

When the end caps have reached the end of their service life, it is more cost-effective to replace the entire mechanism.

Inverter upgrades

They prevent initial and final shocks during braking and acceleration, which reduces component wear.

Radio-controlled controls

Provides radio controls to replace the old ones connected to the crane.

Hydraulic buffers

The hydraulic buffers prevent the crane bridges from bumping on their final travels.

Automations

Laser detection

Any item that is not securely fastened must be reliably detected, no matter how small.

Our laser detection system is perfect for any kind of object, even the smallest cables.

Crane positioning

It implements a camera on the bridge crane and a line with reading codes.

In this way, the camera reads the codes and detects the position of the bridge crane at all times.
